# Bayan Kallash

## Full-Stack Developer (Laravel / PHP / JavaScript)

bayankallash@gmail.com | +970 599 756 244 | Gaza Strip, Palestine | Open to remote worldwide
GitHub | Portfolio | Arabic (Native) · English (C1 Advanced)

### PROFESSIONAL SUMMARY

Full-stack developer with disciplined command of software engineering fundamentals — system design, data structures, algorithms, and clean architecture. Engineers Laravel and PHP solutions with precision, from well-modeled data layers and secure APIs to polished, intuitive interfaces. Holds work to a high standard of clarity, maintainability, and technical rigor. Open to remote full-stack and backend roles.

### SELECTED PROJECTS

**Form Generator v2.0** — **Personal Project**
Laravel 12 · Livewire 3 · MySQL · Google Gemini AI · github.com/bkallash/form-generator

- Built a full-stack form platform with drag-and-drop builder, public share links, CSV export, conditional logic, and multi-page layouts.
- Integrated Google Gemini AI for chat-based form creation, sentiment analysis, anomaly alerts, and dashboard health digests via queued background jobs.

**The Margin** — **Personal Project**
Laravel 13 · Tailwind CSS v4 · MySQL · laravel/ai · Pusher · github.com/bkallash/the-margin

- Built a blogging and knowledge-publishing platform with article authoring, tags, nested comments, likes, saves, and author follow feeds.
- Implemented AI vector embeddings and hybrid semantic search with real-time autocomplete; added admin moderation, content reporting, and live notifications via Laravel Echo and Pusher.

### EDUCATION

**B.Sc. Software Engineering** — **Sep 2022 – Present**
Islamic University of Gaza — Gaza Strip, Palestine

- Coursework: software architecture, data structures, algorithms, databases, OOP, and web engineering; focus on full-stack development and agile practices.

### CERTIFICATIONS & FURTHER TRAINING

**SPOCS Agentic AI Course — Specialized Track** — **Jul 2025 – Present**
bkallash/ai-agents · Ongoing · github.com/bkallash/ai-agents

- Specialized program on LLM-based agent architecture, prompt engineering and reflection, tool augmentation (MCP, search, Text-to-SQL), multi-agent collaboration, memory management, and agent evaluation frameworks.

**Advanced Laravel Bootcamp — UCASI (Verified)** — **May 2026**

- Advanced PHP/Laravel: MVC, Eloquent ORM, middleware, authentication, and API development — completed alongside full-time studies.

### TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | PHP · JavaScript (ES6+) · HTML5 · CSS3 · SQL |
| **Backend** | Laravel · Livewire · MVC · Eloquent ORM · RESTful APIs · Queues · Authentication & Middleware · MySQL |
| **Frontend** | Blade · Tailwind CSS · Bootstrap · Responsive UI Design |
| **Tools** | Git · GitHub · Docker · Pusher · Laravel Echo · Linux CLI · VS Code |
| **AI / Agents** | LLM Agents · Prompt Engineering · MCP · Multi-Agent Workflows · Tool Augmentation · Agent Evaluation |
| **Practices** | Agile / Scrum · Problem Solving · Algorithms · Technical Documentation |
